About the User Manual

This is user manual provides the details **ASCII Text Based Chemical Structure Tuner (ACST): String Reversal Mechanism for SMILES Notation** is a software device. It describes pre-installation requirements, installation procedures and instructions to use the software device.

Who can use ACST?

Ans: Scientist and students of Chemistry, Chemical Informatics and Computer Science. Anyone who wish to study the effect on chemical structure of a compound from modification of corresponding string of SMILES Notations.
